Reflection

1. What is the purpose of multi user configuration in this network?

Multi user allows multiple point-to-point connections between multiple instances of packet tracer.

2. What are the 2 methods in addressing the wireless router? How does one method differ from the other.

The two methods are Static and DHCP, Dynamic Host Configuration Protocol (DHCP) is a network management protocol used on Internet Protocol (IP) networks for automatically assigning IP addresses and other communication parameters to devices connected to the network using a client–server architecture.

3. Enumerate the most important procedure in setting up a wireless environment.

● Practice active management.

● Use managed wireless products.

● Prioritize usage.

● Develop a guest policy carefully.

● Build security from the start.
